

LOCAL CLUSTER SCHOOL INTERACTION

Schools in the local Catholic Schools Cluster include:

Mary Immaculate Primary, Annerley
St Elizabeth's Primary Tarragindi
St Pius X Primary, Salisbury
St Brendan's Primary, Moorooka
St Ita's Primary, Dutton Park
St Sebastian's Primary, Yeronga

Teacher interaction with schools in our local cluster

Teachers meet with staff from other Catholic primary schools for professional development activities, sharing professional practice and resources and moderating student samples of work.

Cluster Cross Country

Local cluster schools gather to compete in the cross country events from Years 4-6. This carnival is hosted by Mary Immaculate Primary School and St Brendan's Primary, Moorooka.

Secondary School Connections

Mary Immaculate Primary School has a strong connection with Our Lady's College, Annerley. Students from Our Lady's visit the school and provide drama (clowning) for our junior students. Similarly, Mary Immaculate opens its classrooms to Our Lady's College early childhood students to observe lessons and interact with students. Modern Mary's support early years classes in literacy block activities. Both schools share their facilities and support mechanisms if circumstances warrant.

Catholic Primary Schools Music' Festival

Our school participates with 10 other Catholic primary schools in the Catholic Primary Schools' Music Festival. Each year we are astounded with the quality of the performance, the arrangement of songs including solo and group. The performance, involving approximately 350 students with only two combined practices, highlights the commitment and dedication of both the music teachers and students involved! A performance always worth looking forward to! Each year is better than the previous one!

Queensland College of Music Festival (QCMF)

The Prep-Year 3 Choir and Year 4-6 Choir participates in the Queensland Colleges Combined Music Festival (QCMF) with an impressive record to date. We are fortunate to have an experienced and professional music teacher (Mrs Gabrielle Mitchell) who produces a magical sound! This is a great experience for our students.
